## Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-5, 6-10 and 20, drawn to requesting to registering a business directory listing, classified in class 705, subclass 1.
- II. Claims 11-15 and 16-19, drawn to an Internet based computing application, classified in class 709, subclass 203.
- 2. Inventions of group I and groups II, are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention of group II has separate utility such as using an Internet based computing application. This separate use patentably distinguishes the invention of group II from group I, since the feature of using an Internet based computing application is not a limitation of group I. Therefore the invention of group II is a separately usable subcombination. See MPEP § 806.05(d).
- 3. The inventions are distinct, each from the other because of the following reasons: the reasons given above and have acquired a separate status in the art as shown by different classification and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purpose as indicated is proper.
- 4. Since the examiner knows from past experience that an election will not be made by telephone, this restriction is proper under MPEP 812.01.
